

Introduction new grass technology by Barenbrug on 11th of February 2021

Barenbrug introduces a new resilient grass technology for turf professionals like greenkeepers, fieldmanagers and sod growers. Do you want to prepare your grass for extreme weather conditions? Barenbrug invites you for the official introduction of a new grass technology that will help you to be ready for future extremes. Save the date: 11-02-2021 11.00h CET!

Changes in climate lead more and more to extreme weather conditions. After years of development and many trials in extreme conditions Barenbrug has developed a technology that helps turf professionals to be prepared for such conditions. The solution: a grass technology that is able to take the punches and fights back!

A black event poster with white and yellow text. At the top, it reads "Introduction new grass technology" in white. Below that, the date "11-02-2021" is written in large white font, with "11.00h CET" underneath. A blurred image of a green grass sod is visible in the background. At the bottom left, it says "Streamed on:" followed by the YouTube logo and the text "Subscribe & hit the alert button!". At the bottom right, there is a yellow bar with the Barenbrug logo and the text "Online event".

BARENBRUG
Online event

This unique technology is the solution for the best drought and heat tolerant cool season turf grass areas with an excellent winter performance too. Official introduction will be, due to the current pandemic, digitally in the *Barenbrug Online Event* on the 11th of February at 11.00h CET. During this event we will show you the possibilities of this grass technology for various turf grass professionals and give insight of the technical background.

If you already want to registrate already, subscribe to our Barenbrug online event at the following page: www.barenbrug.biz/barenbrug-online-event-2021
